As is true for all the reports and products I release, this Case Study is based on real results which I have achieved — the methods, strategies and tactics you're getting are tried and proven effective. Thousands of people will access this Case Study, and those who will follow up by taking action on the information it contains will be amazed at how well this system works and the financial benefits it can bring.

I hope YOU are one of those individuals who choose to make it happen.

Let's get started now because I have much to share!

Hello and Welcome!

My name is Brian G. Johnson and in the coming pages I am going to share with you the exact methods, tactics and strategies I used to increase my free search engine (Google, Yahoo and Bing) traffic by a margin of four to nine times over a period of a few short weeks. This was accomplished by implementing a simple *Expert Content* Method along with a powerful Link Building Tactic that requires ...

... well, little to no *traditional* link building. Really 😊 !

Even better than that, this tactic has the power to fast track your Google rankings, (Google Farmer Update) and all.

Taken From My Google Analytics Account September 2010 – March 2011

I will also be sharing a wickedly effective method to ensure that you're able to monetize your traffic to the fullest by squeezing out every possible last penny from each and every visitor. I like to refer to this method as the Spartan Triangle of Profits. And let me assure you that it offers more leveraging power than any other Internet marketing method or strategy that I know of.

Yes, I Am Launching a New Product!

There is no need to dance around the issue. On Tuesday, March 29, 2011 at Noon EST I will be releasing an exclusive coaching program and, at that time, I will be strongly advising you to invest in it for the sake of your future.

Of course, there are many product vendors out there who offer free reports or case studies that promise great information to help you reach financial goals. Unfortunately, often times these offerings leave you hungry and craving for more.

This will not be the case with my Case Study which contains real tactics and true strategies that work effectively and efficiently. Rather than speak for myself and my products, I would like you to read the following unsolicited post that was taken from the Warrior Forum.

There is no question that this Case Study, will be worth your time and attention.

Spartan Style and Leverage

Effective leveraging will easily increase your earnings as you work the same amount of time but do it smarter. And the results are more traffic, more earnings and more fun!

That's what this Case Study is all about; showing you how to worker smarter to achieve more. After all, isn't that what got you started in online marketing? For me it's plain and simple — it's not about the latest plugins, the greatest software apps or the coolest social media — it's about making the money needed to do the things I want, when I want them.

I have been a fulltime Internet marketer since 2003 and I have made amazing money online by promoting other people's products as an affiliate. I have also done very well with the Google AdSense program and I have earned tremendous income by selling my own products and services.

In and of themselves, each of these moneymaking methods is fantastic but provides only a fraction of the earning potential that is available to you with the Spartan Triangle of Profits because it combines all of them to form an unbeatable force.

But what does "leverage" mean, anyway?

According to Princeton University (wordnetweb.princeton.edu/perl/webwn), the definition of "leverage" is:

- The mechanical **advantage** gained by being in a position to use a lever.
- **Strategic advantage**; **power** to act effectively; "**relatively small groups** can sometimes exert immense political leverage."

So you see, "leverage" can provide you with a strategic advantage, it can put you in a position of power and you can exert immense power in small groups. This is certainly all very good stuff for Internet marketers, don't you think?

Prior to 2008, I had focused on single moneymaking methods such as affiliate marketing and/ or AdSense. Since then, however, I've been taking my business to much higher levels which opened up more opportunities for making a whole lot more money and it all started with a solid business plan.

My “Spartan” Battle Plan

The goal was to finally, after nearly five years, build my own email list with which I could monetize in the near future and for many years to come.

My list was built from free search engine traffic and was not dependant on others, primarily from Google but also from YouTube and other sources. This gave me a wider range of options and provided that “leverage” about which I had spoken earlier. As you can see, this is very different from what I had done in the past because I used to simply sent visitors off to various affiliate offers (eBay, costume affiliate programs, web hosting, etc.) and hoped for the best, in essence I was building their business rather than my own.

In building my list, I focused on individuals who were actively seeking information about Internet marketing and those who wanted to be educated on the subject. Furthermore, I was in looking for people who would stay with me for extended periods of time.

The number of niche markets that can be tapped into is literally staggering. Often times, people think that there are only so many niche markets that are suitable for list building such as Forex or weight loss (and needless to say internet marketing)

However, this is not at all true because there are hundreds of great “list” niche markets online, I sent about two minutes pulling up a few examples:

- Learn HTML
- Dog Training
- Learn Drupal
- Gain Muscle
- Lose Fat
- Gain Weight
- Learn Banjo
- Learn to Knit
- Learn a Language (French, Chinese, Mandarin, Spanish, German, etc.)
- Candle Making
- Soap Making
- Learning PhotoShop

As mentioned this was just a handful of examples of potential niche markets, but you can easily expand the list to many hundreds by using free keyword phrase tools and searching for what I like to call “Learning Keyword Phrases.” For your convenience, I have included a list of such Learning Keyword Phrases below.

Choose the niche markets that are based on your own personal experience and/or your passion. For instance: if you’re interested in building chicken coops, paper airplanes or learning origami; you might be pleasantly surprised at the number of others who also share your interests which is the makings of a niche market that is suitable for list building.

I am willing to bet that a good percentage of these individuals are ready and willing to spend money on acquiring information and there is absolutely no reason why you could not be the one to profit from it. The best news of all is that you don’t even need to be an expert on any of these subjects, but we’ll talk more about it later.

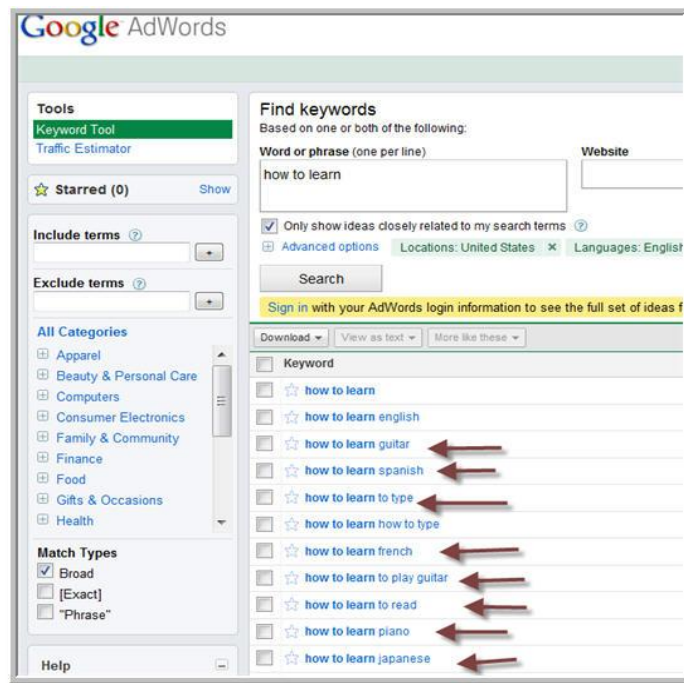

Learning Keyword (Seed) Phrases:

- Learn
- How
- Instructional
- Learning
- Fix
- Build
- Course
- Book
- eBook
- Tutorial
- Video
- Instruction
- Learn how
- Learn to
- How to learn

You can access the free Google keyword tool here:

<https://adwords.google.com/select/KeywordToolExternal>

I personally chose to start out with affiliate and Internet marketing as I have already had some practical experience in these areas. Overtime, however, I ventured into other markets where I had no experience at all. This motivated me to develop a system that is simple enough for anyone to leverage, regardless of their personal experience or lack of it.

Thus, you too can use the methods presented here and enter into any niche market you happen to choose. In the process; you will be creating sites that offer true value, drive lots of free search engine traffic and, over time, generate money.

The Beginnings of the Spartan Rank & Pillage System

In order to leverage my business even further, I needed to take myself out of the content equation. I had to create a simple system which could be easily implemented even by a hired hand and would result in lots of extremely *high quality, expert content* on my various traffic-driving and moneymaking sites. This enabled me to enter into three new niche markets: pet related, home and garden related, and my primary niche, Internet marketing.

My Rank & Pillage Objectives:

- Creation of High Quality Unique Content
- Quick & Easy
- Cheap (if I choose to outsource)

I soon came up with a simple, yet ultra powerful strategy that first entailed identifying various experts in a given niche and finding them on

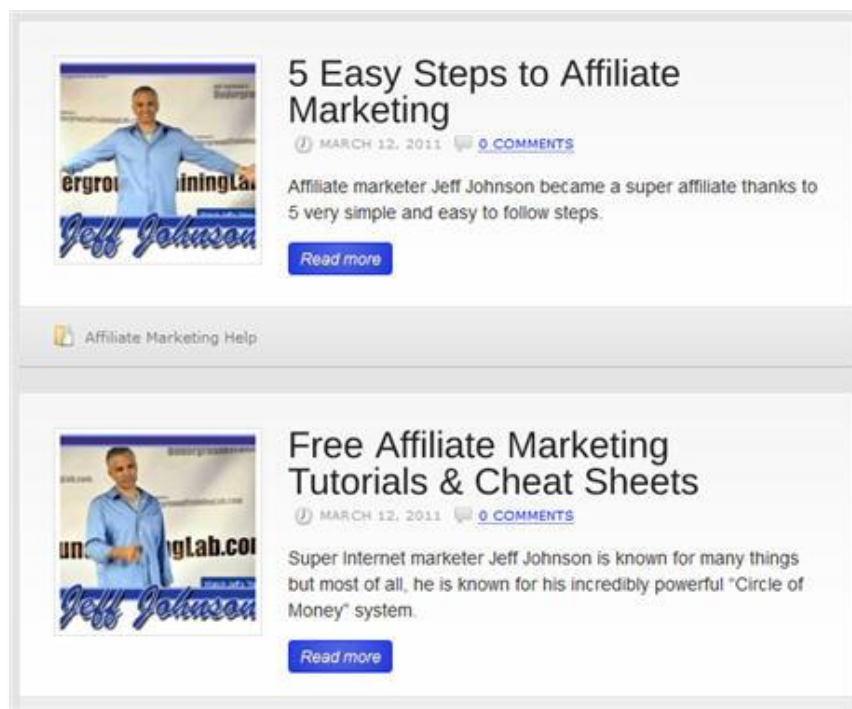

YouTube.com. Secondly, my strategy involved viewing those expert YouTube videos and writing short posts of 150 to 400 words.

My goal here was to create a large site that contains many posts and pages and so shorter articles were acceptable so that my site would grow quicker. This was based on another simple, yet very effective SEO tactic (Spartan Link Leverage) that would allow me to rank easier for highly competitive keyword phrases. More on this will come up soon.

What makes this system so very effective is its simplicity and the fact that there are expert-type YouTube videos for virtually any niche market.

Below you can see images of videos from some of the major league Internet marketing gurus such as Jeff Johnson (not my relative), Jordan Belfort, Gary Halbert and a host of other videos from many other online experts.

The Results

Within just weeks of implementing this content strategy, I began to see a very nice increase in traffic to my website because people who were interested in my niche market were continuously landing there.

The screen capture below was taken on March 11 from my Google Analytics account and it shows a few of the keyword phrases used by my site visitors. Even my friend and JV partner James J. Jones is listed there. Also, notice the keyword phrase for Jordan Belfort and Local Mobile Monopoly, a new product to launch within my niche market.

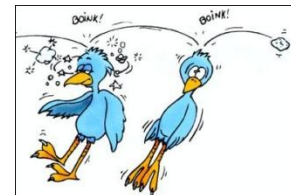

66.	internet marketing seminar
67.	internetmarketing course 2011
68.	is the mark anastasi fb auto for real
69.	james j jones
70.	james jackson internet marketer
71.	jermaine griggs
72.	jordan belfort video limiting beliefs
73.	keyword winner daniel tan
74.	keywords for seo
75.	krizia
76.	latest seo tips
77.	local internet marketing classes
78.	local mobile monopoly

Even better than the increased traffic is the fact that visitors to my site are opting into my email list and doing so at a very brisk pace because each post on my site contains a little blurb about a free report people can download.

I am sure you have heard that the money is in the list and I can tell you from personal experience that this is very much the case.

Note: The article above was not based on a video but had been written in a “who is” fashion. That is, I instructed my assistant to write a short article about my friend and partner, James J. Jones. Later, we incorporated the small optin blurb which took care of “two birds” with one swoop and resulted in:

1. More optins and an ever growing list.
2. Better Google page rankings for the optin page which, of course, results in more traffic and still more optins.

Not only can simple little articles be based on expert content type videos but they can also be based on current events relating to your niche market, people and products. This type of content leads to what I like to refer to as a List Magnet Website and my site is currently enjoying an average of 225 new monthly subscribers.

That may not sound like a whole lot of new subscribers opting in but it will add up to 2,700 over the course of a year. And I know many marketers who own similar size lists and make job-ending income. Besides, I expect the number of monthly optins to increase as the site grows more and more.

Then on March 13th, I actually received an optin from some of those mini articles I mentioned that were based on motivational speaker Jordan Belfort, again, more optins, a bigger list and more profits.

Some Effort Required!

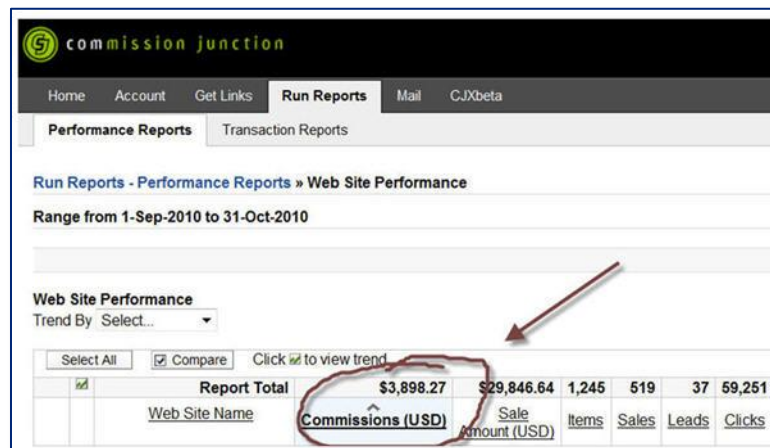

There are many products out on the market which make all kinds of crazy claims. One of my favorite is that a given product “takes no effort at all” or that it is “total income automation.”

In my experience, there is no such thing as easy money or 100% auto pilot income. Sure, some of these products can save you time or energy but, in order to make that job-ending income, some effort is required.

In every product I have ever released I always state that in order to effectively cash in, one must do at least some work. The methods presented here are no exception to this rule. If you are looking for that magic bullet, I cannot help you. If are interested in attaining results with no effort, then I still cannot help you.

However, if you are tired of chasing down every shiny object, if you are ready to treat this as a real business and you are ready to start making some real money, then what is presented here as well as in my coaching program which will be launched on March 29 are blueprints to massive revenues. I, myself, enjoy multiple streams of income and I would love the opportunity to teach you to enjoy the same.

If you are ready to roll your sleeves up for work (not hard, but does take some effort), to stay focused and to take action on my strategies; you too can earn staggering amounts of money online and I can help you get there sooner before later. Your job, should you decide to join my coaching program, is to simply show up and participate in your online education which will ultimately transform will into a Spartan Super Marketer.

Save as much as 20% on Domain Registration at DomainCheapsters.com

Alright, enough with the *focus* and *take action* rant ... let's get back to the free training.

Many marketers are under the impression that only new tactics and strategies will provide results, this may be true for loophole type tactics, however many old school seo tactics work just as well today as they did several years ago.

This brings me to my onpage SEO guidelines below, I have taught (and used myself) this same method for several years now because it plain works, you too can leverage this very system to ensure your getting the best rankings possible with your new site content.

Get The Most Out of Your Expert Video & Text Based Content – onPage SEO Optimization

1. Always post unique and original content that is found nowhere else online.
2. Always use the targeted keyword phrase within your site title tag.
3. Always use the targeted keyword phrase within your site meta description.
4. Always use the targeted keyword phrase within your site content, one or two times.

5. Always use the targeted keyword phrase within the domain name. Exact is perfect but close is also good.
6. Always create outbound links from your site homepage and the WordPress link section to other well ranking sites for similar keyword search terms.
7. Always cloak each every affiliate link.
8. Always created inbound (backlinks) to your site from sources such as: other related blogs or sites as well as Blogger, WordPress.com Feeder sites, Social Bookmarking sites, Video sites, and so on.
9. Always add images to your site pages and always use the Alt Tags.
10. Adding YouTube videos to your homepage and other posts is optional but highly recommended.

Introducing the Spartan Link Leverage System

Far too many so called experts make SEO much, much too complicated. Let me break it down for you in simple terms:

1. SEO Optimized Content to Your Site
2. Links to Your Site
3. Time

That's really it! I hate to bust anyone's SEO bubble but the plain fact remains that if you focus on the most important stuff such as quality content (see Spartan Rank & Pillage Method above) and links to your site, the page rankings will come. So, let's now talk about outranking the competition on Google and other search engines by leveraging that which you already have.

The age of a site as well as the number of links (backlinks or inbound links) pointing to it often distinguishes the winners from the losers in regard to Google rankings and driving free search engine traffic. That is especially true when attempting to rank for highly competitive keywords and keyword phrases.

Let's take a close look into the Google ranking for the phrase below:

Free internet marketing course

What factors do you think are determining the Google ranking for this very competitive phrase?

I actually targeted this phrase myself in January of this year by building a simple little page with some solid onpage SEO factors (keywords in title, description, image file names and so on). Lo and behold, I was able to break into the top ten within just several weeks.

Having spending some time researching the top pages in Google for this phrase (***free internet marketing course***) two ranking factors became quite clear:

1. The sites that ranked well were very old, some as dating back to 1998!
2. The sites that ranked well were very well optimized and had great internal linking structures.

As mentioned above, top rankings are made up of SEO optimized content, links and time. All sites listed in the top five results of Google were at least nine years old and most of the sites in positions 5 through 10 were also well aged as their launch dates ranged from 2001 to 2009. Only two much younger sites were able to slip into the top ten with one of them being NetMarketingCourse.net — my site!

Getting Into the Top Ten in Google in Just Weeks!

So How Did I Do It?

SEO Optimized Content and Links!

Spartan Link Leverage Explained

Most people who have a basic understanding of search engine optimization (SEO) and ranking in Google and the other major search engines (Yahoo & Bing), understand that backlinks are important but so are internal links within the site navigation and its structure.

Unfortunately though, too many marketers undervalue the power of internal links in their websites which point to various pages and/or sections within. Or maybe they are simply not aware of the significance. In any case, this is not a new or groundbreaking concept but it is one that works extremely well.

You may remember me mentioning that each post on my site offered a little blurb about my free report which can be downloaded. Well, these blurbs link to my optin page with a variety of anchor texts (words within the actual link) such as:

- Free Internet marketing mini course
- Free Internet marketing course
- Etc.

In the graphic above you can see the link to my optin page in blue. It contain most of the words which I am targeting: “[Free Internet Marketing Course](#).”

About 95% of my posts contain this blurb along with the link. This establishes my site as an authority on the subject of Free Mini Course for Internet Marketing which prompted Google to rank it in the top ten in a matter of weeks. I have to also mention that this term is very competitive with many millions of results — usually around 17+ million but this number fluctuates from time to time.

Making Money Online – It’s About Working Smart & Applying Leverage

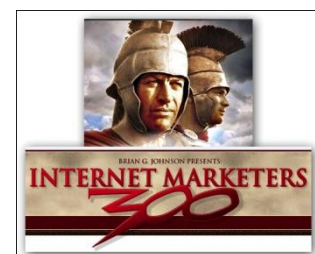

If you have been driving traffic to affiliate offers and AdSense sites and if you are making money, congratulations! You’re doing better than most online marketers. Now it’s time to begin thinking about building YOUR OWN BUSINESS. Start out by building an email list and you’ll be on your way to establishing a true Internet marketing business with a solid foundation and tremendous potential.

Do You Mind if I Get Personal?

I have released five Internet marketing courses in the past three years and my sixth one is just around the corner. Each and every one of these courses reveals the exact blueprints, methods, strategies and tactics which I have personally used to cash in online.

Folks, this is as real as it gets!

300 Internet Marketers (my sixth course) offers members the same techniques that have allowed me and countless other marketers to earn more than we ever thought possible, and it can happen for you too. But remember what I have already mentioned, it takes a bit of effort, not a lot, but some and you must stay focused.

There are no magic bullets and there is no special sauce which so many marketers seek out day after day. In my time as an Internet marketer I have witnessed far too many low-priced products that offer nothing of substance or value but plenty of hype and empty promises.

If you are ready to get serious about your financial future and if you are willing to begin building YOUR online business one brick at a time; I can help you reach your goals. Come March 29, I hope to see you on the inside of 300 Internet Marketers.

I know this course will change lives because it happened last summer when I released my first coaching program (Halloween Super Affiliate). As they say, history repeats itself and I invite you to be part of it.

Best,

Brian G. Johnson

People **DO NOT** fail at Internet marketing,
they simply **GIVE UP** before the magic happens.
